Jim,

Here's the communications strand to date on ARC's request on bottled water, etc.

Thanks,

David A. Seter, P.E.

Dave – In response to your email below, we intentionally left out street addresses because of the property owners' previously stated sensitivity about having that information made public. A revised version of Attachment 1 to Jack's letter, with property location addresses included, is attached here. This version and the prior version of the table include the well numbers in the first column. Let us know if you need anything else. Note that I'm copying a smaller group on this email.

Subject: RE: Yerington Mine Site - Letter re Domestic Well Monitoring and Bottled Water Programs

Adam,

Thanks for forwarding this. I will need to consult with EPA's legal and management teams before responding.

Can Atlantic Richfield please provide additional documentation? At a minimum I would like to see a list of properties (with street addresses) that have been hooked up to the city water system with the associated well number assigned under the domestic well monitoring program.

Thank you.

Best Regards,

Dave Seter, P.E.

Subject: Yerington Mine Site - Letter re Domestic Well Monitoring and Bottled Water Programs

Dave – I'm forwarding the attached letter on Jack Oman's behalf. It summarizes completion of the Yerington City water system extensions to properties north of the mine site, and it requests confirmation from EPA that domestic well monitoring and bottled water deliveries can be discontinued for these properties and also for properties receiving treated water from the YPT system. Please contact Jack with any related questions.
